

MR compatible camera M12

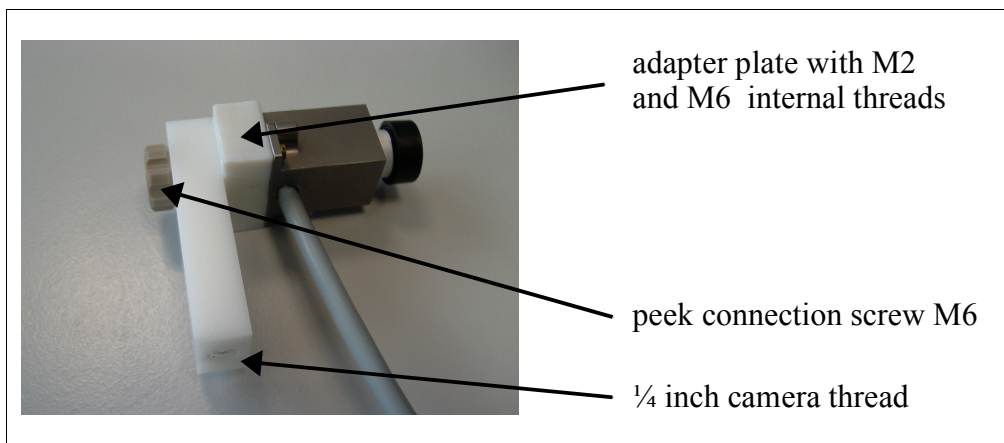

User manual Tripod adapter

This manual describes the tripod adapter for the MR compatible camera M12.

Description

With the tripod adapter the camera can be mounted on a standard tripod with ¼" camera thread (see figure 1). Through the 6mm hole this adapter can be connected to the camera plastic plate with the M6 plastic screw.

The bottom side of the adapter provides a ¼" thread that can be used for the connection to several commercial tripod systems.
